As some of the most premium sites available, STAGE 1A section sizes vary from the low 500's to nearly 1200 sqm in size. Enjoying views to the north and east through the Orewa River to the sea, STAGE 1A is bordered by two parks including Millwater's future sports grounds, and is just walking distance to existing schools and kindergardens and the soon to be established Millwater shopping centre. These sections represent possibly the most astute buying for the pioneering home owner or serious investor. STAGE 1A will set the standard for the many stages to be released over the coming years and therefore a high standard of design and construction is expected, further outlined in the Millwater Design Guidelines.
